

Day 23 - Hardening, Scale & MLOps

Executive Dashboards - PlaceMux Phase 3 | Data Analyst | Task 23 | Week 6

Task focus: Build executive dashboards.
Definition of done: Executive dashboards live.

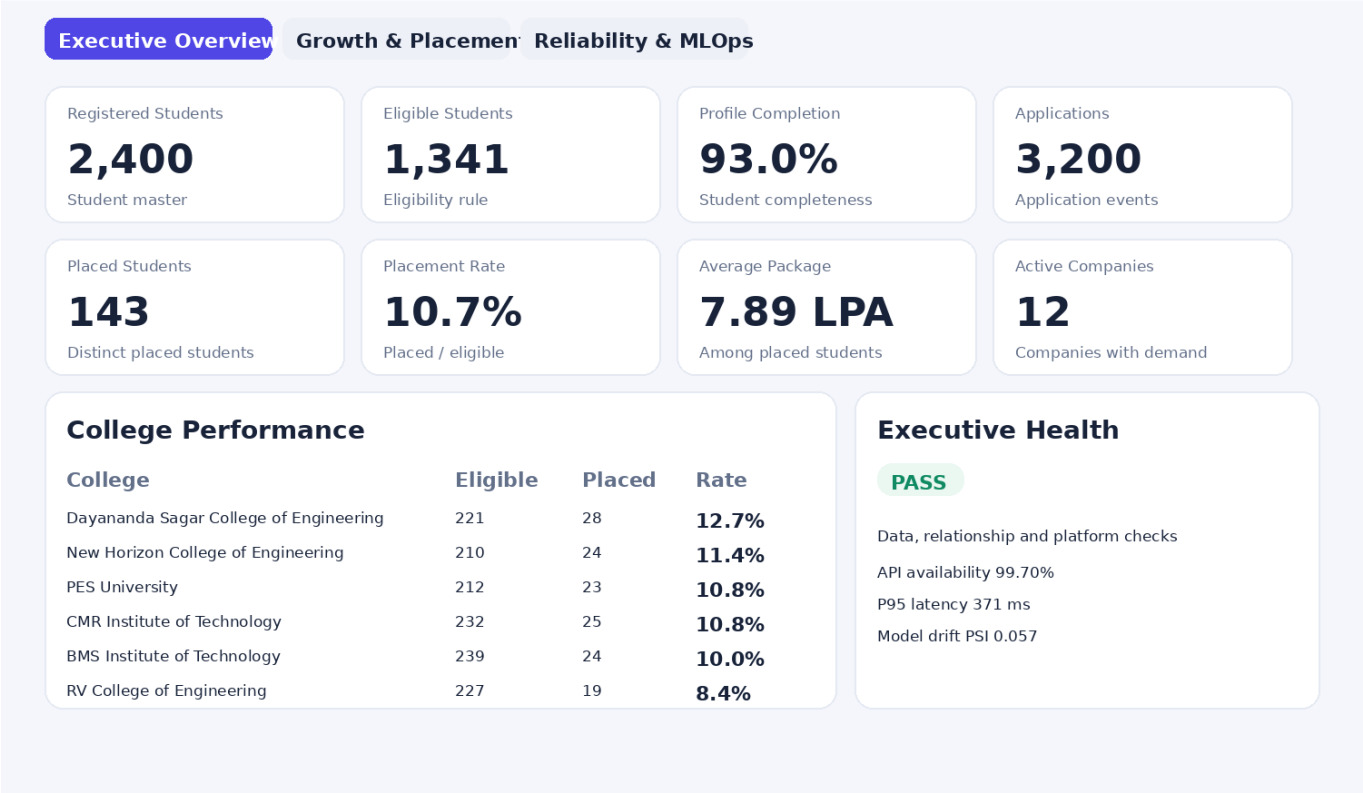

Area	Metric	Value
Scale	Registered students	2,400
Scale	Applications	3,200
Outcome	Placement rate	10.7%
Outcome	Average package	7.89 LPA
Platform	API availability	99.70%
Platform	P95 latency	371 ms
MLOps	Model drift PSI	0.057
Controls	Validation	PASS

Data note: all values are deterministic synthetic demonstration metrics. They are not claims about production PlaceMux performance.

Dashboard Evidence - Executive Overview

PlaceMux Executive Dashboard

Executive view across placement outcomes, marketplace activity, reliability and MLOps health - Synthetic demonstration dataset

Visual preview generated from the same deterministic metric outputs used by the self-contained dashboard. Browser screenshots can be substituted after the local demo run.

Dashboard Evidence - Growth & Placement

PlaceMux Executive Dashboard

Executive view across placement outcomes, marketplace activity, reliability and MLOps health - Synthetic demonstration dataset

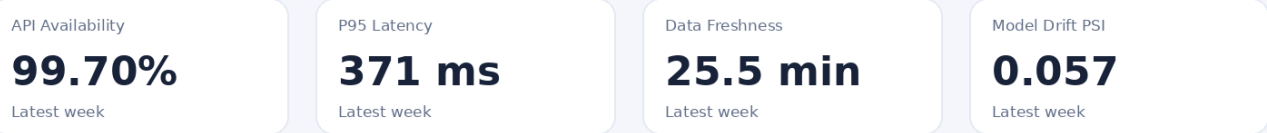

Visual preview generated from the same deterministic metric outputs used by the self-contained dashboard. Browser screenshots can be substituted after the local demo run.

Dashboard Evidence - Reliability & MLOps

PlaceMux Executive Dashboard

Executive view across placement outcomes, marketplace activity, reliability and MLOps health - Synthetic demonstration dataset

Executive Overview Growth & Placement Reliability & MLOps

Reliability & MLOps Trend

Availability / Pipeline

375 ms
PSI 0.068

427 ms
PSI 0.081

428 ms
PSI 0.080

Latency / Drift

384 ms
PSI 0.084

370 ms
PSI

371 ms

Scale Guardrails

- Latency > 500 ms
- Drift PSI > 0.20
- Pipeline / freshness breaches

Visual preview generated from the same deterministic metric outputs used by the self-contained dashboard. Browser screenshots can be substituted after the local demo run.

Reproducibility & Repository Evidence

Run from the project root: `python phase2/executive_dashboard_demo.py`. The script generates the synthetic source CSVs, KPI output, machine-readable validation JSON, and the self-contained HTML dashboard.

File	Purpose
executive_dashboard_demo.py	Synthetic data generation, calculations, validation and dashboard generation
executive_dashboard.html	Self-contained executive dashboard
executive_dashboard_metrics.csv	Calculated KPI output
executive_dashboard_validation.json	Machine-readable validation evidence
executive_dashboard_metrics.md	Metric definitions and formulas
executive_dashboard_tracking_plan.md	Tracking requirements and governance
executive_dashboard_model.md	Logical analytical model
task23_submission_answer.md	Separate written submission answer

Validation: {"duplicate_student_ids": 0, "duplicate_application_ids": 0, "applications_without_student": 0, "invalid_application_stages": 0, "negative_offer_values": 0, "ops_missing_rows": 0, "latency_threshold_breaches": 0, "drift_threshold_breaches": 0}
